Front End Software Engineer, I bring with me over 2.5+ years of valuable professional experience (+2 years of freelance) . Throughout my journey, I have been a crucial contributor to numerous company projects, engaging from the initial development phase to successful product launches, and even tackling the inevitable "bug fix Fridays". Now, I am eagerly seeking a stimulating role that will allow me to continue expanding and refining my skills.

Work Experience

Front End Software Engineer
Quality & Reliability S.A. - Αθήνα
November 2022 to Present

Quality & Reliability (QnR) dabbles mainly on hellenic goverment projects.

• Collaboration for development of mainly Hellenic Government projects such as PPC, OAED, MFA.
• Optimized existing software codebase to eliminate unnecessary complexity and achieve increased efficiencies in debugging and maintenance.
• Development of android/ios apps for private sector clients.
• Aggregated software project knowledge and documentation for future development teams.

Full Stack Software Engineer
Grapevine Digital SA - Αθήνα
July 2021 to November 2022

Grapevine Digital is a start-up SAAS company that got created after the integration of giaola and 11888.gr as a maintainer of the said project.

• Implemented decoupling of the existing project through the creation of a REST API and a comprehensive front-end redesign.
• Worked closely with the team to successfully develop the front-end of new projects.
• Maintained, debugged and developed new features for existing codebase.

Education

University in Technical Computer Applications
Hellenic Open University - Απομακρυσμένη Εργασία
August 2022 to Present
